

Webquest CDC

Go to this website : <https://www.cdc.gov/coronavirus/2019-nCoV/index.html>

- 1) What does CDC stand for? Which country created it?
- 2) Why doesn't the country choose to vaccinate the entire population?
- 3) Which part of the population gets the vaccine first?
- 4) Are pregnant women protected from Covid-19? What should they do?
- 5) What does the vaccination consist in?
- 6) What may the consequences be after being vaccinated?
- 7) Benefits of getting the vaccine:

Say if these statements are **right** or **wrong** and justify by quoting the text:

- a) You may catch the virus that is included in the vaccine.
- b) The efficiency of the vaccine is very satisfying.
- c) Some experimentations are still carried on to check vaccines.
- d) It will protect you from getting all other diseases.
- e) If you get vaccinated, your family will be protected too.
- f) It is easy to predict how people will react to the virus.
- g) People who have caught the virus are immune for more than 2 months.
- h) Once you get your shots, your mask is not useful anymore.
